GRAIN TESTING FOR NON-PRICING PURPOSES

EFFECTIVE: November 1, 2018

Southwest Grain facilities will run grain tests on samples for non-pricing purposes with the following conditions:

- 1. If for insurance quality testing purposes – the producer whose sample is being tested needs to authorize the tests by furnishing a signed form of release by the insurance company.**
- 2. If the Southwest Grain Facility asked to run grain tests is busy the request may be denied as to not interrupt or inconvenience patrons.**

Southwest Grain personnel may determine that quality tests needed to analyze the sample is outside of our ability and equipment to test and ask that the samples be forwarded to a state or federal inspection agency.
